It is an event based on the ones in real life but taking place in virtual reality, allowing each user (exhibitors and visitors) to choose their own customised avatar.

With this avatar you can:

- Tour through the exhibition
- Chat between the exhibitor's and visitor's avatars
- Click on posters and podiums in the virtual stands, from where links will be open to online catalogs, videos, web pages, etc.

WHICH ARE THE DISTINGUISHING ADVANTAGES OF AN ONLINE E-VENT?(I)

- **Online format:** democratizes access to the event since it avoids, for both attendees and exhibitors, travel costs, hotels, etc.
- **Unsuspendable:** the online format guarantees its realization, regardless the weather conditions, health matters, etc.
- **Participation costs** between 80 and 90% lower than in a real world event.

The logo for e-ventos features a stylized globe with a grid pattern in the background. The text "e-ventos" is written in a bold, blue, sans-serif font across the center of the globe.

The logo consists of a green square with rounded corners. Inside the square, the word "EARTH" is written in white, bold, uppercase letters at the top, and "FRIENDLY" is written in white, bold, uppercase letters at the bottom. Great savings in time and HR before and after the event.

International reach: interested parties can enter from anywhere in the world, without leaving their homes or offices.

Database: the exhibitor receives all the information about the attendees (name, surname, email, country and company). Including booths they visited, billboards they clicked on (leads) and chat conversations.

(AGROINTELIGENCIA2020)

I sincerely applaud and congratulate each and every person involved in this conference. I admit I had my doubts at first, even to make the registration but everything was handled in a very professional way. I must also say that this proposal you are presenting is a game changer, something needed in this market.

ONCE AGAIN I CONGRATULATE everyone for the realization of this AGROINTELIGENCIA event, for the presentations, the interesting topics, the high profile speakers, the proximity shown even being remote, the control and organization of each event was perfect. I have to add that the virtual conference "is of another planet", amazing proposal. I am very satisfied that I have participated in this conference, it was worth it.

From Culiacán, Sinaloa, Mexico. I sent you a my greetings and a big congratulations on being pioneers of the conferences and agrodigital exhibitions.

Abner Osman Especiano, México

Congratulations on the conference carried out by your company. The organization, the punctuality and the management of the questions was remarkable. At times I felt that there were few recesses left in between for lunch or going to the bathroom, but I do not know if I had resigned having one less talk for increasing the downtime. I found the online fair EXCELLENTE as a marketing tool. Congratulations again, I personally was surprised by all the applied technology I discovered in these two days. I'm 25 years old and I really enjoyed it. Greetings, and up to the next AgrolIntelligence
